Living Colors

People are driven by emotion – and color elicits different emotions in people. As the world’s largest coatings company, no other company has more experience in color trends than AkzoNobel. Home to the Aesthetics Centre, our in-house color and design experts anticipate and predict movements in trends that affect color and coating choices for architectural applications. We have drawn on the knowledge of our global Aesthetics Centre, along with our own Australian insights, to produce this Residential and Industrial Powder Coatings Collection – Living Colors.

The Interpon Range

Interpon TC

Interpon TC is a durable powder coating designed to meet the specific needs of the Industrial and General Trade Coater markets. The Interpon TC range of powder coatings feature higher transfer efficiency, excellent coverage and high levels of damage resistance. Interpon TC is available in an extensive range of brighter colors, ripples, textures, and special effect powders.

Interpon D1000

Interpon D1000 is a high durable powder coating developed on in-house resin technology providing an ideal finish for all external applications. **Interpon D1000** offers the applicator excellent application performance with superior mileage, high powder utilisation and faster curing, making it the most versatile and best performing product in its class.

Interpon D1000 Excel™

Interpon D1000 Excel™ has been developed for application over porous substrates, such as hot-dipped galvanised (HDG) steel and castings, providing greater application tolerance and improved final film appearance. **Interpon D1000 Excel™** is also suitable for aluminium and steel substrates.

Interpon D Approved Applicators

AkzoNobel has developed the Interpon D Approved Applicators Network to support the Interpon D Global Warranty Program. This program is designed to ensure the Interpon powder coating you choose is applied correctly, meeting Interpon Powder Coatings warranty requirements to local and international standards. To view all Interpon D Approved Applicators please **visit www.specifyinterpon.com.au**.

For more information or to become and Interpon D approved applicator please speak with your Interpon technical representative.

Color Freedom

AkzoNobel values the importance of color and finish in your design and understands that color expression is an extension of your project. Why not take advantage of our made-to-order color service. For smaller projects down to 20kg, **Interpon MiniB™** and **Interpon MiniB™ Micro** provides fast service on small batch made-to-order colors that are specific to your needs. Some conditions do apply such as choice of color and product. Please contact the Interpon Customer Care Team for additional advice.

How to Specify Interpon Powder Coatings

Once you have chosen **Interpon** Powder Coatings for your project, it's important to use the correct product. So we make specifying **Interpon** powder coatings easy. Simply:

- a.** Nominate the **Interpon** product. e.g. **Interpon D1000**.
- b.** Nominate the color, finish and product code. e.g. Anodic Natural Matt GY235A.

To find your nearest **Interpon** applicator, please contact your **Interpon** representative or the **Interpon** Customer Care Team.

Care and Maintenance

Maintaining the integrity of your powder coated products is just like caring for your car – and is a smart way to protect your investment. Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight color change. A simple regular clean will minimise the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings. The best method of cleaning is by regular washing of the coating using a solution of warm water and nonabrasive, pH neutral detergent solution. Surfaces should be thoroughly rinsed after cleaning to remove all residues. All surfaces should be cleaned using a soft cloth, sponge or a soft natural bristle brush.

Category (AS4312)	Corrosivity Level	Environment Type	Required Cleaning*
C1 & C2	Very Low & Low	Non-hazardous Environment	Every 12 months
C3/T	Medium	Tropical Environment	Every 12 months
C4	High	Swimming Pools / Light Industrial	Every 6 months
C4	High	Coastal Environment	Every 6 months
C5-M	Very High	Beach Front / Marine	Every 3 months
C5-I	Very High	Heavy Industrial Environment	Every 3 months

*Refer Interpon Powder Coatings – Care and Maintenance sheet for further details.
